Career Path

Web Developer

Speciality

Front End Coding

Short Bio

An enthusiastic, highly motivated graduate from Fanshawe College. Delilah enjoys working on projects that can bring happiness to others. She is very adaptable to any environment, whether that's on a team or by herself.

Coding to her is like a puzzle. Usually, there's never only one way to figure out a problem, so she enjoys figuring out the solution and understanding why the solution worked and why other solutions could've also worked too. If she's stuck, then she's not afraid to ask for help, or to research the solution.

Delilah hopes to work with a reputable company, with a team that can support her when she needs, and offer back support when it's asked of her as well.
